Description			
For example un-selct Operations from this link: https://www-bd.fnal.gov/Elog/?entryIDs=1&logNames=Operations The entryIDs refinement disappears as well.			
Not all refinements are removed, just the entryIDs and the unselected refinement, for example: https://www-bd.fnal.gov/Elog/?entryIDs=1&logNames=Booster%2C+External+Beamlines%2C+Linac%2C+Operations&userNames=kjh
